

RAVEN

TACTICAL COMPUTING

RUGGED | RELIABLE | READY FOR ANY MISSION

GCS Series

Rugged Ground Control Systems

The Raven Tactical Computing GCS allows highly configurable solutions to accommodate end users' demanding requirements. Housed in a rugged pelican case, The Raven GCS can incorporate the following-

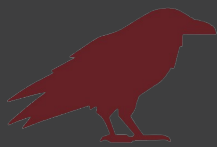

- Software Defined Networking (SDN) to manage and prioritize inputs
- Cyber Security Appliance with Deep Packet Inspection (DPI) to defend against cyber-attacks
- Mission Compute that can be basic compute or High Performance Computing with 144 Cores, 1TB Memory and 512TB of Storage.
- Systems incorporate direct sunlight readable single, double and triple screen options and I/O using an Xbox 360 Controller.
- The system is designed and manufactured to meet MIL-STD 810G and is TAA and MOSA compliant.

Raven GCS

RAVEN DOCTRINE REAL-WORLD SCENARIOS: GROUND CONTROL STATION (GCS)

Integrated. Secure. Deployable. Mission Ready.

Raven GCS delivers a complete, mission-ready solution that ingests, secures, processes, and displays critical data for **real-time** decision making at the tactical edge.

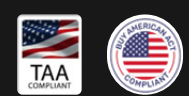

SINGLE OPERATOR SETUP | RAPID DEPLOYMENT | RUGGED & PORTABLE | ZERO TRUST SECURITY | END-TO-END INTEGRATION

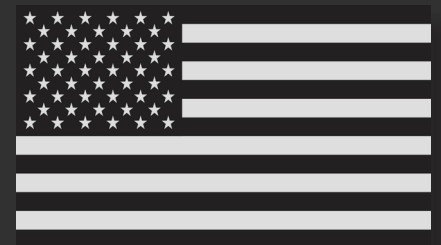

About Us

Raven Tactical Computing has over 40 years' experience in the use, design, development and manufacturing of defense and industrial computing hardware solutions. With a defense pedigree born out of actual experience and the use of the technology in combat environments, we understand our customers and their expectations when it comes to real world environments. Our manufacturing is vertically integrated, from the metal on up, we design and manufacture in-house to assure quality and speed of delivery.
